DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in Paper No. 5 is acknowledged.

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as single means claims having undue breadth.

Claim 1 is a single means claim having undue breadth. See *In re Hyatt*, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed Cir. 1983). Therefore, claims 1-6 are rejected.

Allowable Subject Matter

4. Claims 7-16 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The art of record taken separately or in combination fail to teach the claimed detector having an interference coating in the environment of the claim.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art of record are cited for their teachings of optical modules used in the communications systems.
